

Section 1 – Chemical Product and Company Information

PRODUCT IDENTIFIER:	Untreated Cellulose Fibres	PRODUCT NAME(S):	Celib (CEL25, CEL33)
Synonyms:	paper fibres, untreated cellulose	MANUFACTURER:	Can-Cell Industries Inc. 14735-124 Avenue Edmonton, Alberta, T5L 3B2
Description:	processed paper fibres (no additives)	Emergency Phone:	1-800-661-5031
Product Type:	raw material (non-specific)		

Section 2 – Composition / Information on Ingredients

<u>Component</u>	<u>CAS Number</u>	<u>Percent by Weight</u>	<u>Exposure Limits</u>
Cellulose fibres (recycled newsprint fibre)	#65996-61-4	Not more than 95%	PEL/TWA = 15 mg/m ³ total dust (PNOC) PEL/TWA = 5 mg/m ³ respirable fraction TLV/TWA = 10 mg/m ³ inhalable (PNOC) TLV/TWA = 3 mg/m ³ respirable fraction
Ammonium Sulphate (NH ₄) ₂ SO ₄	#7783-20-2	Up to 6%	PEL/TWA = 10 mg/m ³ total dust (PNOC) TLV/TWA = 1 mg/m ³ inhalable (PNOC)
Moisture (water)	-----	Up to 15%	N / A

Section 3 – Hazard Identification

Emergency Overview

Avoid contact with extreme heat sources and open flame – may emit carbon monoxide and other toxic decomposition products when burned. Untreated cellulose fibres do not present any unusual hazard if involved in a fire.

Potential Health Effects

Inhalation is the most significant route of exposure in occupational and other settings. Mild irritation of the respiratory tract is possible – respiratory protection is recommended while handling dry product.

Untreated cellulose fibres are non-irritating to eyes and skin under normal industrial conditions. Although it exhibits low acute toxicity, this product is not intended for consumption. Ingestion of a small amount is not likely to cause harm – larger quantities may cause gastrointestinal symptoms.

Cellulose fibres are not considered a carcinogen by any authority.

Section 4 – First Aid Measures

Inhalation:	If irritation occurs, remove person to fresh air. Respiratory protection is recommended when handling dry product.
Skin Contact:	Untreated cellulose fibres are non-irritating. Wash with soap and water after handling.
Eye Contact:	For severe dust exposure, flush eyes with warm water for a minimum of 15 minutes. If irritation persists for more than 30 minutes, seek medical attention.
Ingestion:	Although ingestion of significant amounts is unlikely, gastrointestinal symptoms could occur. In such cases, give two glasses of water and seek medical attention.

Note to Physicians: Severe exposure to dust may produce symptoms in sensitive persons or those with pre-existing respiratory conditions.

Section 5 – Fire-Fighting Measures

Thermal decomposition (smouldering combustion) can occur when dry product is in prolonged contact with extreme temperatures and/or open flame. This product is not fire resistant.

Suitable Extinguishing Media:	Any available media (Type A fire condition)
Unsuitable Extinguishing Media:	None
Special Hazards in Fire:	None
Required special PPE for Fire Fighters:	Standard protective equipment

Section 6 – Accidental Release Measures

Personal Precautions:	Nuisance dust.
Environmental Precautions:	Untreated cellulose fibres are biodegradable and will not cause damage to vegetation via root absorption. This product will not cause localized contamination of surrounding waters and poses no known hazard to fish or other aquatic life.
Methods for Cleaning:	Sweep, shovel and/or vacuum up and place in containers for disposal in accordance with applicable regulations.

Section 7 – Handling & Storage

Handling: No special handling is required. Handling on a “first in, first out” basis is recommended to maintain package integrity.
Storage: Covered indoor storage is recommended (ambient temperature and pressure).

Section 8 – Exposure Controls / Personal Protection

Engineering Measures: No specific controls needed. Use good housekeeping practices to minimize spills and accumulations.
Control Parameters: Nuisance dust. (dry product only)
Personal Protective Equipment: Use NIOSH-approved N95 particle mask (e.g. 3M 8210) when dust levels exceed exposure limits.
Eye Protection: Generally not required.
Hand Protection: Generally not required.
Hygiene Measures: Standard hygienic practices are recommended.

Section 9 – Physical and Chemical Properties

Physical State:	Solid	Vapour Pressure:	N/A
Appearance and Odour:	Grey fibrous mass, low odour	Vapour Density:	N/A
Odour Threshold:	N/A	Evaporation Rate:	N/A
Specific Gravity:	<1	pH:	7.0 ± 0.5
Boiling Point:	N/A	Coefficient of water / oil	
Melting/Freezing Point:	N/A	Distribution:	Not established
Water Solubility:	insoluble, dispersible		

Section 10 – Stability and Reactivity

Stability of Product: This is a stable product.
Conditions / Materials to Avoid: Contact with extreme heat or open flame.
Hazardous Decomposition Products: None.
Hazardous Polymerization: Will not occur.

Section 11 – Toxicology Information

Acute toxicity: This product is considered to exhibit relatively low acute toxicity.
Local effects: Untreated cellulose fibres are non-irritating to eyes and intact skin under normal industrial conditions. Although this product is not intended for consumption, ingestion of a small amount is not likely to cause harm – larger quantities could cause gastrointestinal symptoms.

Cellulose fibres are not considered a carcinogen by any authority.

Section 12 – Ecological Information

Ecotoxicity: Considering the intended use and function of this product, no environmental hazards are expected. This product is not damaging to vegetation or animal life. Although not expected to pose any specific hazard to aquatic life, disposal of large quantities in bodies of water is not recommended.

Environmental Fate: Untreated Cellulose Fibres are fully biodegradable. No negative effects are anticipated.

Section 13 – Disposal Considerations

Untreated Cellulose Fibres may be disposed of as a non-hazardous waste in accordance with applicable regulations. Tonnage quantities of product are not recommended for landfills – such product should be reused in an appropriate application.

Section 14 – Transport Information

Untreated Cellulose Fibres are not classified as a hazardous material for transport.

Section 15 – Regulatory Information

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and this MSDS contains all the information required by the Controlled Products Regulations.

Section 16 – Other Information

Information presented herein has been compiled from sources considered dependable and is accurate and reliable to the best of our knowledge and belief, but is not guaranteed to be so. Nothing herein is to be construed as recommending any practice or any product in violation of any patent or in violation of any law or regulation. The user is responsible to determine the suitability of any material for a specific purpose and adopt necessary safety precautions. We make no warranty as to results to be obtained in using any material and, since conditions or use are not under our control, we must necessarily disclaim all liability with respect to use of any material supplied by us.
